Featuring Metal Detox tips by Suzie Bond.

@suziebond

How do you incorporate Metal Detox into your business? Do you offer as an a la carte item or build into your color service? Why or why not?

When I saw the incredible results in the 1st month, I decided it wasn't worth doing color without the improved results I was seeing!

What tips would you give stylist on ways to use Metal Detox to help services during the busiest time of the year?

The best part about the Metal Detox experience for stylists is that it takes no extra time! I spray during the consultation (after I've explained Metal Detox) and by the time I'm done mixing color/lightener, it's dry and ready for application!

How would you recommend speaking to a client about Metal Detox take home products this holiday season?

During the color application, explain that Metal Detox neutralizes metals while the shampoo removes them. I often share that in the first 2 weeks after their color service, the hair is susceptible to metal/mineral deposits and I prescribe the shampoo and mask to keep metals at bay.

Any other advice that you would give to stylists on hacks to maximizing profit this holiday season?

For the holidays, I recommend price bundling! For example, if your service is \$30, offer it for free for the holidays with the purchase of the take home regimen.
